## Data Engineer

Highly motivated, hard-working, experienced Data Engineer with the ability and willingness to learn new expertise and adapt to new environments and technologies. Seeking for my next challenge with the opportunity to expand my knowledge and skills while fully utilizing my abilities and contributing to the success of the company.

## Experience

*August 2019 - Present*

### Data Engineer / Data Analyst IDF

An NCO (Non-Committed Officer) at one of IDF's intelligence units.

At my current position, I am a part of a team that analyzes and manages Big Data.

My responsibilities include:

- Providing accurate structures to the data.
- Managing the data stores and the data pools.
- Coding analysis and hypothesis POC.
- Assisting analysts with their hypotheses and providing them with data solutions.
- Automating daily tasks
- Designing data systems in order to simplify data visibility.

*May 2017 - August 2019*

### Intelligence Analyst IDF

As part of Israel's mandatory military service, I worked at one of IDF's intelligence units as an Analyst.

My responsibility was to find and collect relevant data and provide my superiors with vast conclusions.

During my service, I received a Certificate of Merit for my contribution from the head of the unit that's in the rank of Colonel in the 2018 Independence day awards.

## Education

*2015 - 2017*

### Software Engineering Jerusalem College of Technology

The first year of Software Engineering degree.
